CAN YOU SAY HOT?

July is usually the hottest month and has the most sultry days in the year. The days are longer and there's more time to be outside doing all kinds of fun things! But if you're going to be out in the sun, especially on a hot day, you need to stay safe. Here are some tips:

- The worst hours for going out in the sun are from 10 A.M. to 4 P.M. It's best to avoid going out in the sun during this time frame because the sun's ultraviolet (UV) strength is at its peak.
- Rub sunscreen on half an hour before exposure to the sun. Some people only apply it after going outside. This is a mistake since it takes time for your skin to absorb the sunscreen.
- Clothing helps to block sun rays so if possible, wear a light-weight, long-sleeved shirt, sunglasses, and a wide-brim hat to help protect your skin.
- Remain in the shade as much as possible.

Dear Residents:

Summer is here and it is Hot! If you come upon baby wildlife such as deer, skunks, chipmunks, rabbits and squirrels your first alternative is to **Be Safe**. Treat even the cutest, fuzziest baby like it could transmit disease. Avoid touching the animal, and if you have to, wear protective clothing – even babies can bite and scratch. Ask yourself is it injured? If so, look in the phone book and call your local animal control officer. Remember, if you find a baby animal, look but don't touch!

If you have questions about the programs listed below please call me at (478) 929-0229 ext. 12. **Due to the extremely HOT weather I will be at a community each Wednesday from 10:00 am – 11:00 am or however long my services are needed. Please stop by and see me! I look forward to bringing activities to your community.**
